

EQUIFAX

Equifax Collections Suite

**Streamline revenue recovery
across the collections lifecycle**

With delinquencies on the rise, every collections manager must consider: How will your organization adapt to meet the demands of a downturn market?

The answer is simple:
Equifax Collections Suite.

This fully customizable set of solutions is designed to enhance and accelerate your processes at every stage of collections.

Pre-delinquency

Recognize at-risk customers to trigger preventative action

Get up-to-date insight into a customer's financial profile without impacting their credit score

Predict the likelihood of a customer going 90 days or more past due within the next 12 months

Early collections

Preserve valuable customer relationships with targeted treatment plans

Accurately discern the likelihood that a payment will be made within 90 days to determine your best course of action

Receive alerts on credit file changes that may signal a need to adapt strategies

Late collections

Enhance skip-tracing to reach hard-to-contact customers

Get accurate information on your customers' three most recent addresses and phone numbers to boost contact rates

Receive alerts on changes in contact information to prevent wasted time and resources

All stages

Find the best customers to minimize losses and optimize resources

Identify and segment accounts based on potential for revenue recovery

Prioritize collections efforts to maximize results

Smarter collections strategies start today
