

Mortgage Lender Puts The Work Number to Work

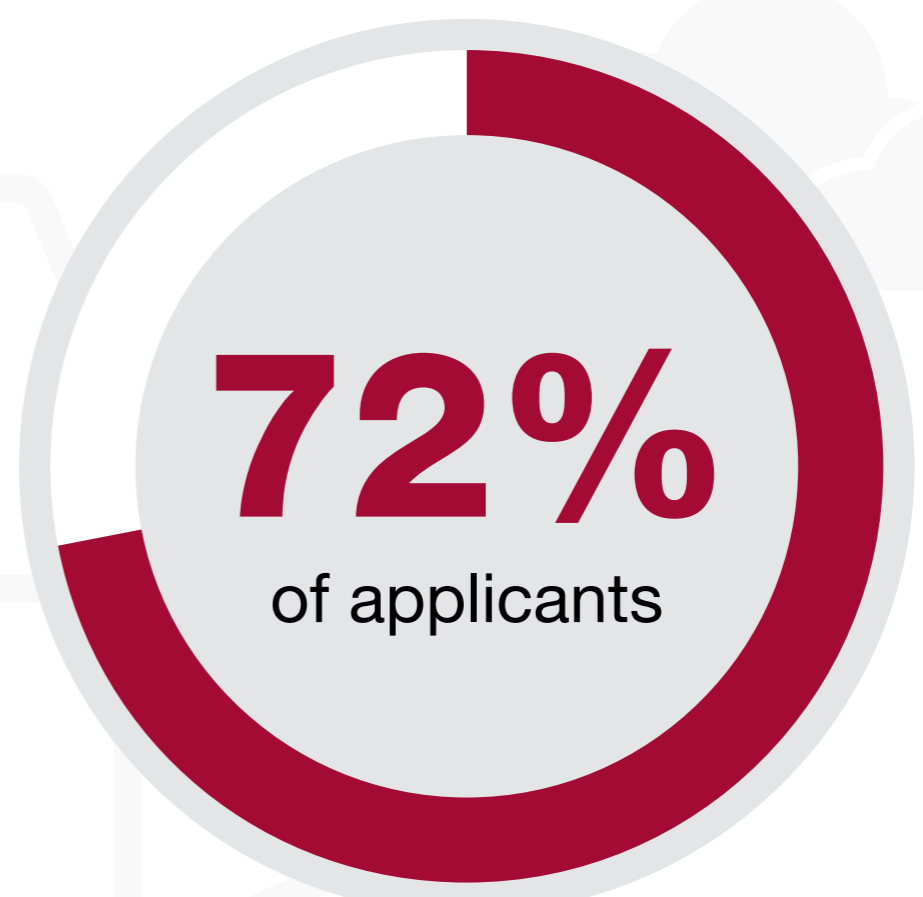

THE **WORK NUMBER**[®]
from Equifax

AmeriSave Leverages The Work Number[®] and 4506-T Tax Transcript Service from Equifax to Accelerate Mortgage Loan Origination, Enhance Consumer Experience.

The Work Number helps leading mortgage lenders like AmeriSave Mortgage Corporation streamline their lending process. By automating employment and income verification, it saves time for both borrowers and staff.

AmeriSave was able to verify income and employment for **80%** of approximately 25,000 loans, **worth more than \$6.5 billion total.**

They also verified W-2 information for **more than 72% of applicants** through the Equifax 4506-T tax transcript service.

“By freeing up our processors from handling income and employment verifications on a majority of loan files, they are able to apply that time saved toward other loan processing functions, which speeds up the entire process. The result has been better turn times for our entire pipeline — 30% faster year-over-year — and a better service experience for our borrowers.”

Magesh Sarma, Chief Strategy Officer, AmeriSave

Verification Streamlining Gets Results

The Work Number delivers meaningful results that both lenders and borrowers can benefit from throughout the entire lending process. For AmeriSave:

Mortgage origination efficiency rose by 15%

Time to close shortened by 5 days
