Troubleshooting Reports and Pulled Values (FN vs FN+Process)

The Reports module allows you to pull from a wide selection of values within a given Foreign National (FN) record or process.

FN Report

The FN Report will pull all values that appear in the **Default FN Values** area of **Processes Forms** within the FN profile.

When utilized in a FN Report, these values will override what is selected in the **Report Criteria** tab of a given report.

FN+Process Report

When you apply the **FN+Process** report, the values you see in the **Assignment** tab of the **Processes Forms** drop-down menu in a FN profile are the ones that can be pulled into the report.

If you encounter a problematic filter, confirm which report type you are employing before troubleshooting unresponsive data pulls.
