Equifax Application Program Interface (API) Integration Overview

Offered as an alternative to accessing The Work Number® via the web or through a batch process, the technology infrastructure and simplified user interface of Equifax® Application Program Interface (API) integration creates straightforward yet customizable pathways for directly connecting clients' to internal systems or applications to The Work Number Integration Server to obtain data from The Work Number.

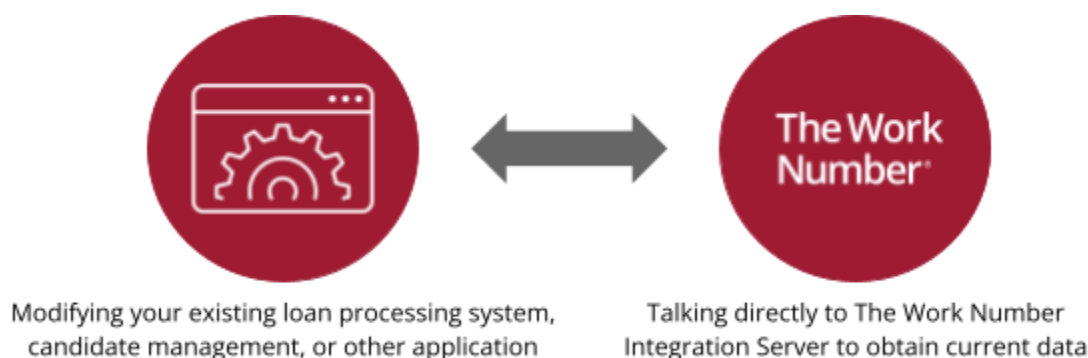

Key Features

Connecting to The Work Number through an integration provides:

- **Customization** that allows you to enhance the user experience, including clearer error messaging, user calls to action, and ordering configurations.
- **Greater control of your workflow** where ordering The Work Number can be automated.
- **Increased flexibility** in your data handling as you will receive the data in XML or JSON format as well as the inclusion of an optional PDF format.

How It Works

Integration enables verifiers to obtain verifications from Equifax Workforce Solutions (EWS) by:

Note: Rigorous testing will be conducted to ensure that the integration works seamlessly with your system or application before going live.

Registering for Access

Depending on the product(s) you are looking to implement, your integration may be either XML- or JSON-based.

- Our **XML option** is accessible through our delivery team. Contact your **Equifax Account Executive** to begin the process of gathering documentation.
- Information regarding our **JSON-based** products can be found at the Equifax developer portal: <https://developer.equifax.com>. Register on the site and you are ready to begin your integration.
