

Court Data, How You Want It.

CDaaS blends automation and world-class expertise to deliver flexible, scalable public records research services.

A Complete Suite of Court Research Services, Customizable for Your Needs.

Court Data as a Service (CDaaS) is the right choice for nationwide public record research. CDaaS provides an unmatched combination of automation, flexibility, and scale, giving CRAs a one-source solution for court data in all fifty states. Background screeners need a court research partner who can mitigate the risks of court data reliability, customer churn, and high overhead. CDaaS combines automation and expertise to give clients reduced complexity, a platform to grow their business, and multiple levels of service that drive accuracy, efficiency, and cost savings.

Service Levels

CDaaS provides multiple levels of service and the option for complete customization of your court research service.

- **Data Only:** Returns the most current record readily available for the lowest possible cost. Data Only service leverages our Synaptec™ automation platform supplemented with on-site court runners where needed.
- **Standard QA:** Applies additional quality assurance, record validation, and additional data clean-up to court records. The process removes unwanted data, confirms identifiers, and will meet the requirements per your unique rules.
- **Enhanced QA:** This full-service options takes the Standard service and applies additional adjudication report filtering per your unique rules.

Why Choose CDaaS?

Automation

CDaaS is powered by Synaptec™, automating record retrieval without sacrificing quality.

Scale

Multiple service levels and nationwide coverage give you a foundation to grow your business.

Partnership

Our team is here to support your goals. We succeed when you succeed.

Integrate

Integrated with the industry's leading platforms.
