

A Fresh Approach to Healthcare Screening Services

Powered by Typhoon Data, ProviderSafe is a comprehensive set of compliance and credentialing solutions built with efficiency, timeliness, and reliability in mind.

Clean Sanctions and Exclusions Data From a Partner You Can Count On

ProviderSafe™ (powered by Typhoon Data) is a leading set of services designed to streamline healthcare screening and compliance. Compared to competing sources of healthcare screening solutions, ProviderSafe products reduce duplicates and unwanted records, significantly decreasing turnaround time and dead-end investigations.

Our focus on data quality and efficiency makes ProviderSafe the smart choice for organizations evaluating their current credentialing and compliance vendor.

Available Services

ProviderSafe equips organizations with a complete package of industry-specific credentialing tools and services:

- **Sanctions, Exclusions, and Disciplinary Actions:** Our solutions provide clean, reliable records. Rather than providing duplicate records that inflate record count, ProviderSafe prioritizes the best record from the primary source.
- **Verification Services:** All potential matches uncovered from a sanctions, exclusions, or disciplinary actions search or monitoring can utilize our verification services. We have a trusted, experienced team that provides verification services.
- **Licensing and Certificates:** We can verify state licenses, state certificates, DEA registration, non-government certificates, and more. To ensure providers have current and valid credentials to practice, we only perform verifications at the primary source according to your request.

OIG has the authority to exclude individuals and entities from Federally funded healthcare programs pursuant to section 1128 of the Social Security Act (and from Medicare and State healthcare programs under section 1156 of the Act). Anyone who hires an excluded individual or entity may be subject to civil monetary penalties (CMP).

Why Choose ProviderSafe?

Less Noise

Deliberately constructed source lists reduce duplicates and ignore irrelevant records.

Primary-Sourced

ProviderSafe solutions are all primary-sourced.

Timeliness

New data is included as each primary source updates.

Flexible Implementation

In healthcare screening, one size does not fit all. ProviderSafe is built on flexibility and can be tailored to cater to differing levels of compliance and credentialing risk. We provide equivalent searches to the most common levels of exclusions and sanctions screening but also offer custom solutions to meet your needs.

Monitoring

All ProviderSafe solutions and services are available as part of an overall monitoring package:

- Provider information can be monitored in near-real time for new exclusions, sanctions, and disciplinary actions.
- License and certificate checks can be completed at a regular, pre-determined cadence in accordance with your specifications.

Verified hits with results are returned quickly, empowering your clients to proactively mitigate risk.

Certification

ProviderSafe is powered by Typhoon Data.

Typhoon Data is Certified by the National Committee for Quality Assurance (NCQA) for the following credentials verification services:

- Certification in Medical Board Sanctions
- Certification in Medicare/Medicaid Sanctions
- Certification in Ongoing Monitoring of Sanctions
- Certification in Verification of Licensure
- Certification in DEA
