

100% Automated Court Record Retrieval

Improve efficiency and turnaround time without sacrificing quality, flexibility, or accuracy.

Put the Power of Court Research Automation to Work for You.

Synaptec™ improves operational efficiency by extracting real-time records directly from more than 3,700 court-authorized sources. Our proprietary robotic process automation (RPA) technology leverages sophisticated search patterns and customizable filters to deliver results how you want them.

Synaptec automates the most time-consuming element of court research, cutting down on turnaround time and expenses without robbing you of control.

Single-source Solution

Synaptec is available as a standalone solution or as part of a more comprehensive service.

- Our **Data Only** service augments Synaptec automated record retrieval with our on-site court runner network to provide comprehensive coverage in every U.S. county.
- Our **Standard QA** and **Enhanced QA** service levels add additional levels of quality assurance tailored to your requirements to help you meet and exceed client-specified guidelines and differing regulatory environments.

Why Choose Synaptec™?

Coverage

More than 3,700 fully automated court sites available.

Technology

Proprietary robotic process automation minimizes unwanted data and finds records quickly.

Flexibility

Synaptec™ can be purchased as a stand-alone solution or leveraged within our broader court research services.

Partnership

Our team is here to support your goals. We succeed when you succeed.
