

EQUIFAX

Right to Work

Complete digital identity verification for R2W & DBS checks, inline with GPG45 Guidance

Equifax Workforce Solutions R2W & ID Verification service can be used to complete digital identity verification for R2W & Disclosure and Barring Service (DBS) checks, inline with Good Practice Guide (GPG) 45 Guidance. Right to work determines whether an individual you are looking to employ can legally work in the UK.

There are codes of practice in place by The Home Office that state you have the possibility of being fined up to £20,000 per person you have employed that do not have the full right to work in the UK.

Equifax can help with a solution that speeds up the process and increases confidence levels to ensure compliance with UK regulations.

Employee Benefits

- Remotely verify your ID and Documents
- Share information securely
- Results within minutes
- Web and App based journey
- Multiple languages

Employer Benefits

- Online ID verification that meets GPG45 standard
- Live facial recognition and verification
- Enhanced fraud checks combined with DBS
- Configurable tools
- Automatic reminders to enhance success rate

Our R2W solution provides fast and efficient identification verifications by leveraging automated face recognition and optical character recognition technology to validate documents. Our team can also provide quick manual triaging if required to avoid potential rework saving you time and money.
