

EQUIFAX[®]

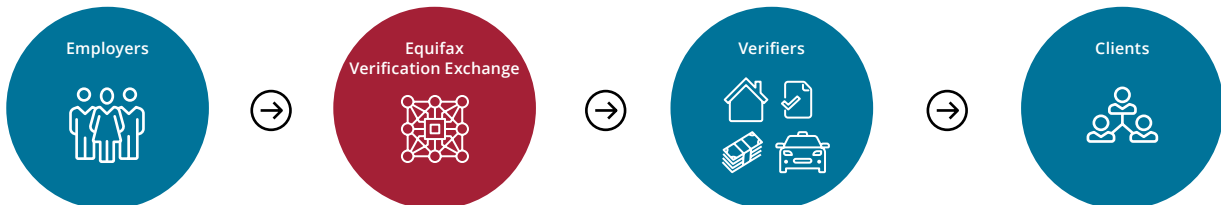

Verification Exchange

Drive Faster Decisions with Automated Employment and Income Verification

When it comes to timely decision making — such as buying a home or accepting a new job offer — an expedient and seamless process is key to the client experience. That's why Verification Exchange[™] is designed to deliver income and employment reports instantly, with current data directly from the source.

How It Works

The income and employment verification process made easier.

Key Features

- Verification Exchange[™] is updated on every pay cycle to provide you with accurate and comprehensive information for timely decision-making.
- The database supports verifiers from multiple industries including mortgage lenders, auto lenders, consumer finance, pre-employment screening, government and tenant screening.
- Income and employment data comes directly from the source, including employer systems, payroll partners and other workforce management platforms.
- Detailed verification reports include all relevant employment and income information such as gross and net income, yearly summaries and wage breakouts.

Benefits for You and Your Clients

Speed and Security

- Verification information is accessible 24/7/365 through encrypted delivery that protects the client's identity.

Unparalleled Client Experience

- The onus is no longer on the client to prove their employment and provide paperwork.

More Accuracy with Less Risk

- Each query is tracked to help maintain compliance and reduce the likelihood of errors and misrepresentations.
