Automotive Insights Report

June 2026

Portfolio Data as of April 2026

Origination Data as of February 2026

Each month, Equifax produces its Automotive Industry Market Pulse, designed to provide automotive professionals with the latest auto credit information and industry insights to help them make informed decisions. This data is critically important for OEMs, lenders, dealers, and service providers.

These reports provide considerable value and insights, including:

- Historical trended data that can provide early indicators of consumer strength in automotive credit
- Overview of total outstanding auto debt, including loans and leases, with a focus on new auto lending patterns
- Origination profiles for car shopping, along with an overview of auto delinquency and early delinquency activity
- A special section on synthetic ID's in automotive originations

Total outstanding auto debt reached \$1.7T in April 2026, representing a 2.2% year over year increase. While total account volume grew slightly by 0.1% to 87.0M, the subprime share of debt grew by 1.0% to reach 21.6%. This portfolio divergence indicates that rising vehicle valuations are sustaining balance growth even as unit volume stabilizes. Lender dynamics reveal a clear shift in risk appetite. Captives drove the largest absolute debt decrease with a 5.7% decline to \$537.9B, while simultaneously seeing a 2.2% surge in subprime share. Conversely, Bank debt expanded by 3.6% to \$537.2B as they maintained stable subprime exposure at +0.0%, notably the only lender type to keep subprime exposure flat. Credit Unions maintained stable growth with debt rising 2.5% to \$465.9B. Deep subprime has 14.3% of all accounts and showed YoY growth alongside Subprime and Super-prime, while other bands contracted.

Early Delinquency

Cumulative % 60+ DPD (#) by Cohort for Q4

Cumulative % 60+ DPD (#) by VantageScore on the latest quarter available (2023Q4)

The 2024Q4 cohort's 60+ DPD is tracking closely with the 2018Q4 cohort, which historically represented a stable economic environment. As for 2023Q4 originations, Super-prime remains the best-performing tier, sitting at a 1.32% 60+ DPD rate after 24 months on book. This rate is 5X lower than the Prime tier's performance over the same duration. This trend is true throughout Credit Tiers with Deep subprime tier exceeding 30.0% 60+DQ by month twenty four.

Synthetic ID 3.0 for Auto Loan Originations

Bad Rate (90+ Days Past Due in 12 Months)

Average Bad Balance (90+ Days Past Due in 12 Months)

Synthetic ID 3.0 provides a score for the likeliness for the applicant to have a synthetic identity.

High SyntheticID Risk is defined as a Synthetic ID 3.0 score above 890 (the score spans 1-990).

These accounts have a significantly higher bad rate than the Low SyntheticID Risk segment, and this effect is particularly pronounced for SuperPrime where scores greater than 720 with high synthetic risk trades have a 7.9% late stage delinquency rate (i.e. 90+ dpd) which is 26X higher than lower SyntheticID score in this credit tier.

A higher average default balance is also true for the high SyntheticID Risk scores. In the SuperPrime score band, the average bad balance is 37% higher for high synthetic risk compared to low synthetic risk trades.

Equifax Credit Trends is the primary source for the data in this report; for more information on this database please visit www.equifax.com/business/credit-trends. Data on new tradeline originations are subject to revision for up to 12 months due to lags in lenders and servicers reporting to Equifax. Data for the most recent 12 months are grossed up for expected but as yet unreported new loans. Data are sourced from Equifax's U.S. Consumer Credit database of over 220 million consumers. These data are population level – not a sample.

Through our IXI Network, we directly measure about \$28 trillion in anonymous, aggregated consumer assets collected from leading financial services firms. This “direct-measured” data represents about 45 percent of all U.S. consumer invested assets and serves as the foundation of our unique measures of consumer financial capacity, investment style, behaviors, and characteristics.
