

# Accelerate the possibilities

## Network Verification Services from Equifax — a premier service provider

### When life isn't instant, we have fast solutions

It would be great if every Verification of Employment (VOE) or Verification of Income (VOI) were instant. Fortunately, when it's not, we have quick solutions that seamlessly help you continue to meet your needs. Priority Next Day™ and Priority Two Day™ are manual solutions to help expedite the research process when information is not available on The Work Number®.

### How it works

- Priority verifications are available to web clients and those integrations and connectors that have coded for the enhancements. Please note: Customers must be contracted for Network Verification Services in order to receive the manual enhancements.
- With the Priority Next Day, we will work to fulfill your request by 11:59 PM CT on the next business day following your request. With the Priority Two Day, we will work to fulfill your request by 11:59 PM CT on the second business day following your request.
- There is no charge if we do not fulfill your verification within the designated time frame, unless the option to convert to the Standard Network solution is selected at order origination. In that case, the order will be billed at the Standard Network price.
- If the order is canceled within the applicable time frame, the order cancellation details are not available.

## The Priority Next Day and Priority Two Day Key Benefits

### Accelerating the manual verification of employment and/or income process

Developed to rush an order through the manual process when information is not instantly available through The Work Number®.

1 business day or 2 business days total work-in-progress

### Maximizing enhanced performance capabilities

On average, requests will receive 2X as many contact attempts in the applicable time frame as the standard offering.

Fulfillment process will have a Priority designation.

### Providing a hassle-free option to convert to the Standard solution

An opt-in feature at order origination that converts the order to the Standard Network offering to continue to be worked if the Priority verification is not fulfilled within the requested time frame.

### Delivering low-risk, high value solutions

There is no charge if the order is not fulfilled within the designated Priority time frame.
