Validate identity

Network Verification Services from Equifax — a premier service provider

Quickly and confidently confirm your applicant's identity
Our Social Security Verification Services solutions are easy, cost-efficient and help validate identity by giving you access to reliable data from the Social Security Administration (SSA).

Key benefits:

- Use electronic signature technology, combined with our fillable PDF SSA-89 form, for instantaneous results[1]
- Online access and full automation with system integration capabilities
- Help reduce reliance on more intrusive authentication methods that may frustrate applicants
- Utilize best-in-class Optical Character Recognition (OCR) technology to perform an 11-point quality assurance check
- Simplify the process with uniform, consistent and auditable results

SSA Authentication Report

The Services feature the SSA Authentication Report and may include additional solutions based on contracting

SSA Death Master File Audit[2]

- Determines if an SSN is associated with a deceased individual

- Helps match a person's key identifiers (name, date of birth and Social Security Number (SSN)) directly with the SSA
- Delivers a match or no-match on SSN

Identity Usage and History Report[2]

- Determines if SSN is valid
- Data may include, where available:
  - SSN issue date and location
  - Previous addresses associated with the SSN
  - Additional SSNs associated with consumer
  - If multiple identities are associated with SSN

For more information about our Social Security Verification Services, please contact your account manager.

[1] All users of the Services are required to register with the Social Security Administration at https://www.ssa.gov/dataexchange/eCBSV/institution_registration.html.

[2] Contract restraints may limit clients from accessing additional features.
