SSN Verification Services

Confirm applicant information with identity assessment and authentication
As credit due diligence tightens, financial and personal pressure can increase the occurrence of fraudulent activity. We can deliver access to the most reliable data sources in an easy, cost-efficient tool mitigating risk in your customer acquisition process.

Our SSN Verification tool can quickly match an individual’s name, date of birth, and SSN directly with information from the Social Security Administration (SSA). If applicable, the report will also highlight if the SSN is associated with a deceased person.

Key benefits
Improved customer interaction to reduce intrusive authentication methods that frustrate applicants
24/7 online access allows you to submit requests anytime and anywhere
Full automation with system integration capabilities available

Identity assessment and authentication process
Authentication of the individual can be combined with verification of employment and income or fulfillment of tax transcripts and W-2s for the utmost in applicant credentialing — all in a single source, Verification Services from Equifax.
