Immigration Case Management
by LawLogix

History

Immigration Case Management has been a leading immigration service for immigration practitioners and enterprise corporations for more than 18 years. Designed and managed by industry-leading immigration experts, Immigration Case Management is a comprehensive immigration case management solution that helps enable organizations to generate efficiencies across their organization.

Stability

In 2022, LawLogix, a leading provider of cloud-based I-9 services and an immigration case management service, was acquired by Equifax, joining their suite of Workforce Solutions employer services. The Immigration Case Management service is one of the industry's leading solutions, storing over 7 million Foreign National Records, and will join the other Equifax Workforce Solutions offerings.

Industry Expertise

Our team of immigration experts regularly meets with industry and government representatives to exchange ideas, and provide guidance and feedback on current industry related legislation and immigration policy. Our deep involvement with the American Immigration Lawyers Association (AILA), the American Immigration Counsel (AIC), the Catholic Legal Immigration Network Inc. (CLINIC) and a wide variety of other immigration industry think tanks, helps set us apart from other case management providers and helps our Immigration Case Management solution stay up-to-date with the ever-changing industry laws and best practices.

Our Clients

Some of the biggest names in immigration trust their case management needs to us because of our commitment to providing a positive experience for their clients. As a proven industry leader of immigration case management solutions, we pride ourselves in developing close relationships with our clients.

Dedication

We understand the importance of helping ensure your clients receive a more streamlined and effective experience from start to finish. A robust system has little value if it doesn't help your clients get the information and results they need in an user-friendly interface.
